

# Are you throwing energy dollars out the window?

**POLAR WALL® Plus!...The Exterior System that makes heating and cooling costs...bearable!**

Over time, drafty, leaking windows can allow thousands of dollars of heating and cooling costs to escape to the outside. Most of us understand that. But what we forget about are the walls. Batt insulation fills the space between our wall studs, providing excellent thermal properties. But what insulates the wall studs? Usually, nothing! Unless your home is wrapped in an energy envelope that covers the studs,

you're losing heating and cooling dollars through your walls as well!

Polar Wall® Plus! siding features a thick, insulated polystyrene foam backing, permanently laminated to the back of a super premium vinyl siding panel. When properly installed to the exterior of your home, it not only helps insulate, it provides a solid surface that resists dents and scratches. It also acts as a sound barrier. And once it's up....it STAYS up! Polar Wall® Plus! has been tested to withstand hurricane force winds exceeding 200 mph. Best of all, the exterior features a tough acrylic finish that's extremely resistant to fade. That's why we back it with a limited lifetime fade protection warranty.

When it comes to energy loss through your windows, Polar Wall® Plus! gives you peace of mind. Our high performance windows feature double glazed insulating Low E glass with thermally efficient Krypton gas between the panes. Heavy duty hardware means they won't stick in the frames. And they come in a full selection of operating styles and grid options to match any architectural look.

Stop throwing money away on energy bills and maintenance. Start enjoying your home more, with the Polar Wall® Plus! Exterior System. Insulating Vinyl Siding and Replacement Windows built tough to perform in all kinds of weather.

Polar Wall® Plus! Exterior Siding carries these trusted symbols of consumer confidence.

WHEN CORRECTLY INSTALLED, POLAR WALL® PLUS! SIDING WITH THE FULLBACK® THERMAL SUPPORT SYSTEM AND POLAR WALL® PLUS! INSULATED VINYL REPLACEMENT WINDOWS CAN HELP MEET THE PERFORMANCE GUIDELINES OF AN ENERGY STAR® QUALIFIED HOME.
